

Unique self-explanatory marking system for hydraulics!

Red and blue shrink: Now with function symbol for further attention to safety!

- Easier explanation of the function of the individual hoses
- Increased focus on the correct use of the system

The images show 39/13 mm shrinkage before and after shrinkage.

Heat shrinkable tubes available in 2 sizes:
 39/13 and 51/26 mm

Blue ID-markers of 51/26 mm supplied without symbol until the next production.

8 pcs. hoses connected properly within 2 min.

Always correct function!

Safety can only be achieved by using the system fully and correctly.

Red / plus must be used for: lift – lock – close

Blue / minus must be used for: lowering – open hatch – side shift right

SafetyMark standardizes functions and ensures permanent marking!
