

**Mini kit for marking of 2 hoses – only €12,81**

Blisterpack in 10 variants, each of 4 pcs set of the function colors: red, blue and yellow with ID no. 1 to 8.

Free return and brake with 2 pcs. in set.

We have complied with requests from the market for an affordable solution for labeling hoses.

- 4 pcs. crimping 39/13 mm for labeling hoses in sizes 15 to 33 mm.
- The hoses labeled individually or in pairs - see picture below and the system description.

**Safety Mark ensures permanent marking and standardizes features:**

- The system always ensures correct function: ID-markers / Connection Plan for the valve outlet and ID-markers on the hoses.
- The system is as simple and ingenious as the control pedals on vehicles having the same function!
- **Red / plus** must be used for: **lift – lock – close**
- **Blue / minus** must be used for: **lowering – open hatch – side shift right**
- **Green / T-line open** must be used for: **float position – free return**

**NB!**

**Always read the system description page 2.04 before you label the hoses on your gear!**

- Follow described standard for maximum security regardless of own ideas, or other coupling patterns.
- Safety before own principles - remember that several people may use the machine / equipment.

**SafetyMark standardizes functions and ensures permanent marking!**
